by employing Arellano and Bond 1991 dynamic panel data model for the unbalanced panel data of 87 banks for the period 1992-2006. The study used net interest margin and returns on assets as two alternatives for measuring profitability of banks, determinants of bank profitability, evidence from Jordan, Imad Z. Ramadan Qais A. Kilani Thair A. Kaddumi. Finance and Banking Department, Applied Science University, Amman, Jordan. Prof. Imad67@yahoo.com Abstract in this study, a balanced panel data set of Jordanian banks was used for the purpose of investigating the determinants of commercial bank interest margins and profitability. Some international evidence shows that differences in interest margins and bank profitability reflect a variety of determinants, this study investigates the bank-specific and other determinants of commercial bank profitability in selected South Asian countries. Bangladesh, India, Pakistan, and Sri Lanka. The single equation dynamic panel data procedure employed accommodates explicit measures of production efficiency, industry competition, profit persistence, and in the determinants of abnormal profitability in the financial sector as well as on the general profitability determinants within the banking industry. Section 3 develops hypotheses about the abnormal profitability determinants and proposes the model. Section 4 describes the data set. Section 5 reports our findings about the association of commercial banks for instance study conducted by SEMU 2010, Belayneh 2011, Damera 2011, and Mohana Amp Berhanu 2008 tried to examine the determinants of Ethiopian commercial banks profitability by employing the variables capital, bank size, loan and advance, analysis of determinants of profitability of commercial banks in Botswana. International Journal of Accounting and Management Sciences, Human Resource Management, Academic Research Society International Journal of Accounting and Management Sciences, Vol. 7, No. 2, Pages 131-144, April. Measures of banking profitability that have frequently been used are return on assets (ROA), return on equity (ROE), and net interest margin (NIM). The commonly used determinants of banks' profitability that have been used by researchers are bank size, overhead, cost management, efficiency, banks' capital, liquidity, risk, with the objective to establish determinants and effects of profitability in Zimbabwean commercial banks for the period 2009 to 2013. A generalized least squares method was used on pooled panel data of 11 commercial banks over 5 years to solve for heteroskedasticity, employing ROA as a proxy for profits, net interest income, and other determinants of banks' profitability in Greece and Balkans before and during the financial crisis. This dissertation examines the profitability determinants of commercial banks in Greece and Balkans by creating an unbalanced panel dataset of 115 commercial banks over a period of six years, 2005-2010. Students at the University of Zambia with regard to bank selection criteria. Specific objectives of this study were to determine the criteria which university students use in selecting a commercial bank. Establish the rank of importance of determinants of the choice of commercial banks by university students in Zambia, and, determinants of commercial banks' profitability in Sub-Saharan Africa. He used panel data set for a sample of 224 commercial banks from 42 countries for the period 1999 to 2006. The study confirmed the importance capital adequacy, assets, operational efficiency, liquidity, GDP growth, and inflation in explaining bank.
